

TECHNICAL SPECIFICATIONS

Pulping and Green Sorter Unit - DCV 183

Ideal to process different qualities of coffee harvesting.

The DCV, with zero water consumption, pulp the coffee cherries through our patented vertical coffee pulper with smart breast channels and it classify the green coffees with our spiral sieve system. The pulped coffee undergoes the demucilating process with low water consumption.

Technical Characteristics View of the equipment

MODEL	DCV 183
Capacity	1.3 – 1.5 m ³ / 1200 kg / 1500 lit Greens + Ripes
Power required Delva	3 HP
Power required Pulper	2 HP
Water consumption	1 lit. x 5 kg coffee cherries
Minimum installation area	8 m ²

* Stainless steel option
