Metal Platform

Description

Lightweight made of drilled and corrugated steel sheet, making it lighter and slip-resistant. Designed for being assembled with the bracket scaffold allowing the circulation of the workers around the building.

Benefits

- Operator safety.
- Eliminates wood use.
- Easy to assemble.
- Decreases installation times.
- Designed to support the maximum weight allowed on site at 125 kg/m².
- Finished with yellow paint to highlight the circulation area.
