

TECHNICAL SHEET FOLDERS OR MENU HOLDER

Rigid cardboard covered in vinyl cloth 75% PVC, 22% PES and 3 PU. This mix of plastics can vary depending on the types of cloth.

If the customer so desires, the textile cloth can each have it's own digital engraving.

Thick sewing around the edges with color poliéster thread, or in contrast.

Color engravement of the logo.

Depending on the design, the cloth will have a metallic hook, or painted metallic screws in the zipper.

Glue for heavy traffic PL285

MAINTENANCE

- The suitable cleaning of the accessories should always be done with a wet wool cloth and never with an abrasive sponge.
- Never submerge the products in water, or leave them exposed to the sun.
- If the materials have any stains, clean with a little water and soft soap, and they can be used for the hands.
- If several days go by without cleaning the stain, never try to clean it with something that lifts the residue, but instead try to dilute with water and soap before, so the material won't be damaged.
- If possible, never store the accessory in a place where the material can be scratched, and if possible place them on a plastic surface.
- Never use strong abrasive liquids such as alcohol, or chemical substances, to clean the products.
