SMART FABRICS

We make uniforms in smart fabrics according to the specific needs of our clients, anti-fluids, chlorine-resistant, fire-retardant fabrics (anti-flame), thermal fabrics, protective fabrics for ultra violet rays, antibacterial fibers, are some of them, these are known with this name since they are capable of altering their nature in response to the action of different external, physical or chemical stimuli, modifying some of their properties, mainly with the aim of conferring additional benefits to their users.
